### **DETAILED ACTION**

The response filed **6/14/07** presents remarks and arguments to the office action mailed **1/12/07**. Applicant's request for reconsideration of the rejection of claims in the last office action has been considered.

Applicants' arguments have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### **Status of Claims**

Claims 1-10 and 20-28 are cancelled and claims 11-12 are amended.

Claims 11-19 are pending.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 1614

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims **11-19** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims **1 - 4** of U.S. Patent No. **6,384,046**. Although the conflicting claims are not identical, they are not patentably distinct from each other.

Both the claims of the patent and the instant application refer to treating neointimal proliferation and thickening and/or restenosis and/or vascular occlusion following vascular injury comprising administering an effective amount of 40-0-(2-hydroxy)ethyl-rapamycin. The current application claims are similar to the patented claims.

Both set of claims recite using the same compositions. See current application claims 11-19 and patented claims 1 – 4.

Although, the claims of the patent do not recite the combination with other drugs, it does recite the open phrase “comprising” therefore the specification of the patent has been used as a dictionary. See col. 7, lines 23-35, where the use of other drugs in immunomodulating regimens, such as cyclosporine A, cyclosporine G, FK-506, corticosteroids, etc, (the same combination recited by the instant claims) is taught. Therefore, the instant claims are an obvious variation of the patented claims in methods of treating xenotransplant rejection.

Claim **11-19** remain provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims **7-9** of U.S. Patent Application No. **11599814** Although the conflicting claims are not identical, they are not patentably distinct from each other. The reasons are as follows:

Art Unit: 1614

Both sets of claims refer to treating a type of proliferation: neointimal proliferation in the current application (claims 11-19) and xenograft rejection (claims 7-9) in the copending application, which is drawn to a proliferation of macrophage-like cells. The current application claims anticipate the copending application claims.

Applicants have not presented a terminal disclaimer and the claims of the above copending rejection remain pending. Since this is not the only or sole rejection remaining, the rejection is properly maintained.

No claim is allowed.
